

Impacts and recognition

- Impact:
 - Awareness of the amount of data produced in the last 15 years
 - Valorisation of Inrap report archives
 - A new way to access Inrap's data
 - Content enrichment (subjects, temporal, spatial...)
- Also we...
 - have begun an internal discussion on opening of other datasets (e.g. Image Library, Fieldwork archives, Scientific datasets,...)
 - participate in two National Consortiums for open access and open data: MASA and Couperin <https://masa.hypotheses.org>
<http://www.couperin.org>
 - started work on legacy data curation
- *“The on-line Inrap documentary data on the ARIADNE platform represents a considerable step forward for the French archaeological community. The next step is putting online information systems containing the primary data. We hope to contribute jointly with the Consortium Memory of Archaeologists and Archaeological Sites (MASA) from the Very Large Facility Huma-Num” – Xavier Rodier, CNRS*
