

# Integrated Data Resources

The screenshot displays a web interface for a resource titled "Wolin shipwreck 1". At the top, there is a search bar with the text "Start a new search..." and a magnifying glass icon. To the right of the search bar are links for "Catalog", "Services", and "About". Below the search bar, the title "Wolin shipwreck 1" is prominently displayed. A blue button labeled "Access resource on the web" is visible. The main content area is divided into several sections: "Metadata" on the left, a "Geographically similar" map in the center, and "Thematically similar" resources on the right. The metadata section lists various identifiers and details, including ARIADNE ID, Original ID, Language, Audience, Resource type, Original Subject, Keyword, Place, Type, Publisher, Issued, and Modified. The map shows the location of the shipwreck in Szczecin, Poland, with a red pin indicating the current resource and a blue pin for a similar resource. The "Thematically similar" section lists other resources like "Puck P-2", "Wolin Reclaw", and "Szczecin Podzamcze". At the bottom of the interface, there are three images: a photograph of the shipwreck excavation site, a close-up of a wooden plank showing tree-ring patterns, and a dendrochronological cross-dating diagram with a red vertical line indicating the current resource's position.

**Creator** Cornell Tree-Ring Laboratory [Organization]

## Data Archiving and Networked Services (DANS), Netherlands

- Integrated archaeological and tree-ring data
- Successfully mapped vocabularies enable concepts-based search
- Repository software made available to promote sharing and integration of dendrochronological data (DCCD)

# Impacts and recognition

- Impact
  - Making more research data available
  - Improved findability across borders
  - Integrated presentation via 1 European portal
- We also worked on:
  - Visualisation of metadata: Map and Timeline
  - Expanding and improving Mediterranean data in the existing collection
  - Worked together with the ADS on the Guide Dendrochronology
- *The Dutch Cultural Heritage Agency (RCE) recommends the ARIADNE portal for the use of Dutch and European digital data (see: <http://archeologieinnl.nl/bronnen-en-kaarten>)*
